

Novel coronavirus infection occurring in Wuhan City, China.

If you come from Wuhan City, China, with symptoms such as cough or fever, or taking antipyretics, etc., please contact the quarantine officer.

Also, watch your health condition, and take the following actions for the next 14 days.

- Check your health condition
 - Check your body temperature for fever every day.
 - Watch your symptoms carefully such as severe cough or difficulty breathing.
 - ※ Pay attention to health condition of your close contacts as well.

- If you develop symptoms such as cough or fever of 37.5°C or higher,
 - ① Wear a mask.
 - Avoid going out to prevent the spreading of infection to others.
 - ② Seek medical care.
 - When you seek medical care, please call and inform the doctor in advance that you have stayed in China (Wuhan). When you visit a medical institution and consult to a doctor, please wear a mask and show this paper and tell your travel history

You can search medical institutions with foreign language speaking staff.

If you have any questions, consult the nearest public health center.
